

## GENERAL STRUCTURE OF THE DISSERTATION

Academic year 2025-2026

### CONTENT

#### **Introduction**

##### **1. The current state of knowledge and research in the field.**

It will include the theoretical part of the phenomenon studied, in the form of a critical study (expressing one's own views on the information included in the paper) on the literature related to the topic addressed, authors and sources of national and international renown, books, treatises, courses, monographs, specialized papers, journals, scientific articles, the internet, etc.

##### **2. Research plan design.**

The material and working method (research) used in the paper: the hypotheses, materials, and instruments used, the procedures and statistical methods intended for analyzing the data obtained, or the qualitative analysis methods, as appropriate, shall be specified. The objectives of the paper are listed at the end.

##### **3. Results and their interpretation.**

Is the section dedicated to the detailed presentation of the results obtained, as well as the discussion of their significance, based on the statistical processing of the values of the investigated parameters. The presentation and discussion of the results must confirm the graduate's knowledge, general and specialized skills acquired during their master's studies.

##### **4. Conclusions and recommendations**

It represents the final part of the project, which summarizes the most important results obtained, highlights their theoretical and practical value, and the degree of originality and creativity of the recommendations resulting from the work with practical applicability.

**Bibliography (References)** all bibliographic citations in the text must be included at the end of the project in the bibliography.

NOTE

- The dissertation shall be written in accordance with the writing guidelines.
- The dissertation must demonstrate advanced scientific knowledge of the topic addressed, contain elements of originality in the development or resolution of the topic, as well as methods for scientific validation of these.
- The title of the dissertation must be consistent with the topic and reflect the content of the paper.
- It is mandatory that the dissertation cover all the topics provided for in the chapters of the recommended structure.
